ELSEVIER Journal of Materials Processing Technology 52 (1995) 625–627

Journal of Materials Processing Technology

Contents of Volume 52

Vol. 52 No. 1, May 1995

Determining of cutting-force components in face milling 1
J. Heikkala (Oulu, Finland)

Decision support for manufacturing using artificial neural-networks 9
T. Canz, S. Jagdale (Tucson, AZ, USA)

High-speed milling in tooling production 27
J. Paro, I. Nieminen, V. Kauppinen (Espoo, Finland)

Tool wear and failure in the drilling of stainless steel 35
M. Routio, M. Säynätjoki (Espoo, Finland)

Powder-suspension dielectric fluid for EDM 44
Q.Y. Ming, L.Y. He (Guangzhou, China)

Processing aspects of laser cladding an aluminium alloy onto steel 55
M. Ellis, D.C. Xiao, C. Lee, W.M. Steen, K.G. Watkins (Liverpool, UK), W.P. Brown (Strathclyde, UK)

Conditions for achieving high-quality welds in the plasma-arc keyhole welding of structural steels 68
J. Martikainen (Lappeenranta, Finland)

Real-time data management in a flexible manufacturing system (FMS) 76
J. Angelva, P. Piltonen (Oulu, Finland)

Distributed dynamic production control in a multi-cell flexible manufacturing system 83
Y. Arzi (Tel-Aviv, Israel)

Machine sharing and performance of cellular manufacturing systems 91
S. Benjaafar (Minneapolis, MN, USA)

Model of a universal manufacturing interface in CIM for small- and medium-sized companies . 102
J. Balič, Z. Živec, F. Čuš (Maribor, Slovenia)

Integrating computer platforms for higher productivity in manufacturing industries 115
J. Pütter (Gothenburg, Sweden)

A feature-based design system for computer-aided process planning 122
T.N. Wong, K.W. Wong (Hong Kong, Hong Kong)

Inter-relations between product variant codifications and assembly work for flexible manufacturing in autonomous groups 133
T. Engström, D. Jonsson, L. Medbo, P. Medbo (Gothenburg, Sweden)

Application of shearography to quality assurance 141
W. Steinchen, L.X. Yang, M. Schuth, G. Kupfer (Kassel, Germany)

Elsevier Science S.A.

Research into the synthetical calculation of the place-and-pose error (SCPPE) of the parts in a machine 151
J. Zhang, J. Huang, J. Yang (Shanghai, China)

Machinability comparison of casting methods 174
I. Shareef (Peoria, IL, USA)

Vol. 52 Nos. 2–4, June 1995

High-pressure die casting: effect of fluid flow on the microstructure of LM24 die-casting alloy . 193
M.R. Ghomashchi (Adelaide, SA, Australia)

Effect of the die angle on the extrusion swell of rubber compound 207
J.-Z. Liang (Guangzhou, People's Republic of China)

Investigation of edge effect from the chip-back temperature using IR thermographic techniques 213
H.T. Young, T.L. Chou (Taiwan, ROC)

Microstructural validation of processing maps using the hot extrusion of P/M Nimonic AP-1 superalloy 225
M.C. Somani, N.C. Birla (Hyderabad, India), Y.V.R.K. Prasad (Bangalore, India), V. Singh (Varanasi, India)

Joining of zirconia to zirconia using Ag–Cu–Ti filler metal 238
H.Q. Hao, Y.L. Wang, Z.H. Jin, X.T. Wang (Xian, People's Republic of China)

A computer simulation of the effect of wall thickness on the metal flow in diecasting dies 248
W.B. Lee, Y.B. Lui (Kowloon, Hong Kong), H.Y. Lu (Shenyang, People's Republic of China)

A kinetic equation for damage during superplastic deformation 270
D. Zhixiao, W. Shichun (Shaanxi, People's Republic of China)

Experimental research into the cold-rolling technology of a spiral conveyer vane 280
K. Weiyi, Q. Anquan (Jilin, People's Republic of China)

Precision forging of industrial battery terminals: an analysis of the preform geometry 289
L.M.H. Brito, J.M.C. Rodrigues, P.A.F. Martins, M.J.M. Barata Marques (Lisboa Codex, Portugal)

Effect of the circuit parameters on the electrolytes in the electro chemical discharge phenomenon 301
V. Raghuram, T. Pramila (Kanpur, India) Y.G. Srinivasa, K. Narayanasamy (Madras, India)

Finite-element simulation of the bending process of steel/polymer/steel laminate sheets 319
Y.M. Huang, D.-K. Leu (Taiwan, ROC)

Steady-state plane-strain cold rolling of a strain-hardening material 338
R.S. Prakash, P.M. Dixit, G.K. Lal (Kanpur, India)

A new technology of sheet-metal flexible-die forming using a viscoplastic pressure-carrying medium 359
M.-W. Fu, S.-Q. Lu, M.-H. Huang (Nanchang, People's Republic of China)

A study on the optimization of the cylindrical lapping process for engineering fine-ceramics (Al_2O_3) by the statistical design method 368
J.-D. Kim, M.-S. Choi (Taejon City, South Korea)

Mirror surface grinding characteristics and mechanism of carbon fiber reinforced plastics 386
K.Y. Park, D.G. Lee, (Taejon-shi, South Korea) T. Nakagawa (Tokyo, Japan)

An analytical approach to asymmetrical hot-sheet rolling considering the effects of the shear stress and internal moment at the roll gap 399
Y.-M. Hwang, G.-Y. Tzou (Taiwan, ROC)

Mathematical modeling of the internal bending moment at the top roll contact in multi-pass four-roll thin-plate bending 425
M. Hua (Kowloon, Hong Kong), D.H. Sansome (West Midlands, UK), K. Baines (Adelaide, Australia)

Review of research into the injection forging of tubular materials 460
M. Arentoft, S.B. Petersen, T. Wanheim (Lyngby, Denmark), J.M.C. Rodrigues, P.A.F. Martins (Lisboa, Portugal), R. Balendra (Glasgow, UK)

An improved method for the application of blank-holding force considering the sheet thickness in the deep-drawing simulation of planar anisotropic sheet 472
D.W. Jung, I.S. Song, D.Y. Yang (Taejon, South Korea)

Process optimization of the inverting–forming of thin-walled tubes with radiused dies 489
Y. He, L. Shunping (Xi'an, People's Republic of China)

A theory and algorithm for the computer simulation of the adjusting and controlling of the spiral flight-rolling process 496
Y. He (Xian, People's Republic of China), L. Shuoben (Quinhuangdao, People's Republic of China), L. Shoujing, H. Wencan (Harbin, People's Republic of China)

A method for residual stress measurement in welded seams 503
M. Kovač (Ljubljana, Slovenia)

A new forming technology for bearing rings by means of precision rolling 515
L. Runguang, L. Yan, D. Qiaohe, S. Qirang (Harbin, People's Republic of China)

A study of orthogonal cutting with tool flank wear and sticking behavior on the chip–tool interface 524
Z.C. Lin, W.C. Pan, S.P. Lo (Taiwan, ROC)

Modeling of the mechanical-alloying process 539
L. Lü, M.O. Lai, S. Zhang (Singapore, Singapore)

An investigation of the decomposition of molybdenite in magnetically rotated plasma 547
M.H. Shariat, M.F. Nasiri (Shiraz, Iran)

The use of multiple flow fields for continuous solutions from upper-bound analysis 561
Y.H. Moon (Pohang, South Korea), C.J. Van Tyne (Golden, CO, USA), W.A. Gordon (Torrington, CT, USA)

Development of a low-cost prototype filament-winding system for composite components 570
S.W. Lye, F.Y.C. Boey (Singapore, Singapore)

A neural-network system for predicting machining behaviour 585
L.H.S. Luong (Pooraka, SA, Australia), T.A. Spedding (Singapore, Singapore)

Finite element analysis of solidification of aluminium with natural convection 592
Y. Chen (Columbus, OH, USA), Y.-T. Im (Taejon, South Korea), J. Yoo (Suwon, South Korea)

A study of the machining of cast austenitic stainless-steels with carbide tools 610
S. Agrawal, A.K. Chakrabarti, A.B. Chattopadhyay (Kharagpur, India)

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
